Product Description

2022 Altoz TRX Model 561Power TrainIt is the unique combination of high performance engines, responsive Hydro

Gear transmissions, and rear torsion axle suspension track system that allows the TRX to go where no traditional zero-turn mower has gone before.

Features may include:

Your Command Center

- The focus is on driver comfort and control.

Traction And Stability

- The TRX track system and rear torsional suspension work together to deliver maximum traction for stability, low ground pressure for minimal compaction and an industry-best ride.

Power On The Go

- Convenient 12-volt accessory power outlet and device storage compartment.

Engines

- Three engines to choose from to suit your preference and horsepower needs.

Smooth Operation

- Power through the harshest conditions, even rough terrain and sharp debris, with TorqFlex front suspension, flat free tires and rear torsional suspension.

Customized Comfort

- Ultimate driver comfort is possible thanks to 12-way adjustable seats with fore and aft, armrest, tilt, lumbar support and rider weight adjustment.

Accessories

- Genuine Altoz accessories for the TRX include utility blade, spreader, collection systems, lawn striping kit, receiver and standard hitch, mulch kit, lighting kit, and more.

Durability

- Fork casters with heavy-duty 1-1/4 inch tapered roller bearings. Engineered to deliver maximum performance and durability in demanding conditions.
