Product Description

2022 Altoz TRX Series 766 I Do more. Go further.™ Get the most ROI from a tracked zero turn mower that gets every job done. Every time. *WHEN YOU NEED ROI ASAP* Let's get down to business. You don't invest in tools for your business unless there's a positive return. That's why faster ROI is engineered into the DNA of a TRX mower. Now you can reduce man-hours, bid more lucrative jobs, and get more business. The TRX was designed for those who know only the best will do. *THE LOW DOWN ON GROUND PRESSURE* Low ground pressure and high traction are key to getting more jobs done with less damage. Limiting ground pressure reduces spinning, rutting, and damaging underground structures - especially on soft ground. The high traction from the TRX track system allows for better control, especially on slopes. *DURABILITY* Fork casters with heavy-duty 1-1/4 inch tapered roller bearings. Engineered to deliver maximum performance and durability in demanding conditions. While C-channel frame rails with formed, laser-cut and welded heavy gauge steel work together for maximum strength and rigidity. *A MOWER DECK FOR THE JOB AT HAND* Aero Deck™ The Aero Deck™ high-output cutting system gives the precision cut you count on. Features recessed anti-scalp wheels and fully adjustable baffles so you can get a professional-grade cut every time. *HV All-Terrain Deck* Heavy-duty, fabricated, reinforced steel deck with six swing blades that absorb impact when contacting solid objects and sloped back rear discharge design that efficiently processes material. *Features may include:* *TRX TURF TRACKS*• Perfect for running over soft ground, rolling hills and sensitive terrain. *ALL-TERRAIN TRACKS*• Unequaled traction and low ground pressure are ideally suited to side hilling, soft ground, and for wet and rough areas other mowers can't reach. *TORSION AXLE REAR SUSPENSION*• Allows the track system to contour the ground surface for traction while the tracks bridge over holes for a smoother ride. *FLAT-FREE TIRE*• Altoz flat-free tires keep your machine rolling over the toughest conditions, and have the feel of a pneumatic tire without ever going flat. *TORQFLEX™ FRONT SUSPENSION*• Smooths out the bumps, delivers stability and reduces operator fatigue. *HYDRO-GEAR TRANSMISSION*• Ensuring smooth, reliable, and responsive control.
