Features may include:

Fly Front Loaders

Capacity

They have gained a reputation for tackling jobs that would overwhelm lesser built compacts.

- Perfect for moving mountains of mulch, gravel, bales, firewood – just about anything else you’ve got to move around your place.

Stout Support for the Loader• Solid cast front axle with center drive line and bevel-gear final drive.

Rear Remotes

Heavy-Duty 3-Point Hitch

- Up to two (1800E) or three (2800E) rear remote valves can be field-installed to power mounted or pull-type implements
- Adjustable top and bottom links. Anti-sway bars are standard.

Add a Quick Hitch

Simple

- Makes it much faster and simpler to attach and detach 3-point mounted implements
- The bevel-gear axle design offers a high steering angle (52 degrees) for excellent maneuverability.

4-Wheel-Drive Work Horses

- Putting more power to ground, providing greater stability and supplying the muscle to knock out heavy-duty jobs that are typically handled by larger utility tractors.

Ease of Use

Work is hard enough. We’ve tried to make our tractors as easy to use as possible.

3-Point Hitch Rate of Drop Accuracy• Position control lets you operate the 3-point hitch with increased precision.

Pedestal Mounted Joystick

- Provides for smooth operation of the loader. Couplers are mounted on front of the valve, making it easy to connect.
