Adjustable Wheels

- With a wide range of wheel-spacing settings, these tractors handle everything from specialty farming applications, like small scale row crops and vegetables, to roadside mowing and land management applications

Rear Three-Point Hitch

- There's virtually no limit to the range of implements you can put behind these tractors. Two gear pumps power the simple, open-center hydraulic system, and a heavy-duty three-point hitch helps provide a rear lifting capacity ranging from 4,850.

Seat Options

The 4700 Series is built for tough, gritty jobs. It's also built to be easy to use and comfortable to operate. From the ground up, these tractors are engineered for smart, ergonomic, long-lasting operation. Because even though the work is tough, your tractor should never be hard on you.

Easy-reach Controls

Features may include:

Durability

- Essential controls are ergonomically positioned for easy operation and comfort.

- It's simple. When all the key components of a tractor are built together, they work better together.

Heavy-duty

- At a best-in-class base weight of 7,125 lbs., the 4700 Series is purpose-built for more pulling power and more lift capacity. Not to mention better maneuverability and more stability.

Transmission

- An easy-to-operate transmission provides multiple speed options and a more comfortable ride, whether you're maneuvering through headlands or around tight spaces in the barn or yard.

3-cylinder 3.3L AGCO Power™ Engine

- At the heart of it all is a rugged, reliable, fuel-efficient Tier 4 Final engine. These engines range from 70-100 horsepower and are specifically configured for North America.

Stability

- The last thing you need is a feeble tractor that shies away from the really tough jobs. The 4700 Series is heavier than other tractors in its class, uniquely designed to handle larger, heavier implements and more demanding applications. So it'll be there when you need it.

Tight Turning Radius

- Sometimes you need to work in confined spaces. These tractors feature a tighter turning radius for easier maneuverability with better stability.

2WD/4WD

- The 2WD axle comes with five track-width settings in 4-inch steps to accommodate virtually all crop or field conditions. An optional hydraulic-controlled differential lock on the 4WD front axles ensures that drive is evenly
