Product Description

2023 IronCraft 8200 Series 8207 Our full line of eight core plug aerators, ranging from 48" to 84" in width, will help relieve soil compaction and promote plant growth. With four models, you can size your aerator by the acreage being conditioned or by the size of your tractor. Models are available to aerate anything from a homeowner's lawn to an athletic field, municipal golf course, or farming application. Core plug holes provide the plant roots with better access to oxygen and improves the ability of the soil to hold water which could run off on non-aerated ground. These holes guide water and nutrients deep into the ground to reach the plant roots. Models are a 3-point Cat 1 hitch.
