Product Description

2024 ASV Compact Track Loaders RT

75 Heavy Duty WHEN THE DUTY IS HEAVY The RT-75 HD is built to get more done, especially in forestry and mulching applications, while requiring less maintenance. Like the RT-75, the HD is engineered with a next-generation MAX-Series cab and patented Posi-Track® technology and provides the industry's highest ground clearance, lowest ground pressure, longest track life and best traction over all types of surfaces—and it offers some heavy-duty extras, too.

Take On More The HD model ensures our operators get maximum durability, serviceability and productivity in the toughest conditions.

Features may include:

POWER

- The RT-75 HD features a Cummins 2.8-liter turbocharged diesel engine. The 75-horsepower engine produces 221 foot-pounds of torque—13 percent more than the machine's 80-horsepower predecessor. This HD model delivers maximum power, without compromise, during mulching and brush cutting jobs.

PERFORMANCE

- The hydraulic system in the HD is highly efficient, including 35.7 gpm high flow and 3,300 psi. This model also comes with a hydraulically driven, auto-reversing cooling fan to blow debris out of the engine compartment screens. It offers hydraulic bucket positioning and a full rear brush guard is available as a factory installed option.

COMFORT

- With a next-generation MAX-Series cab, the HD features plenty of creature comforts that let operators work more comfortably for longer periods of time: more all-around space, improved ergonomics, an upgraded HVAC system for better circulation and defrosting, an all-weather pressurized cab for a cleaner operator environment, heating, air conditioning, standard joystick controls, a Lexan door and a Bluetooth radio with USB.

SERVICEABILITY

- Like the RT-75, the HD model gives operators easy access to the reliable Cummins engine through a three-panel hood and tilting cooler arrangement. The design, paired with sight gauges for both hydraulic oil and coolant, simplify routine inspections of filters, oil and normal service items. The RT-75 HD can be paired with all standard attachments, such as backhoes, buckets, snow blades, brush cutters and pallet forks.
