Product Description

This boat is 17' long and comes with a fully welded, durable 100 Gauge Aluminum Hull, Stern & Side Walls, and a flat diamond plate floors & forward deck for the ultimate in stability. Like all Beavertail Custom Aluminum Boats, this model also offers a foam-filled floor and front deck as well as flotation pods that provide your watercraft with extra lift and load offset. Our 17' Beavertail Custom Aluminum Boat features our exclusive forward tapered front deck to run water out of the bow, plus a drop floor in the stern for securing batteries & a fuel tank. This boat has 24" side walls, and comes equipped with two 10' water-resistant gun boxes for stowing firearms and extra gear. We didn't stop at the gun boxes, however. We went the extra mile to provide additional standard features on all of our Custom Aluminum Boats that include: heavy duty rub rails and gunnel, built in tubing for running accessory wires, front and rear grab handles, interior mounted heavy duty tie-down loops, and High Definition Olive Drab Paint for a non-reflective wear-resistant finish. With all of these standard features, it's no surprise that Beavertail Custom Aluminum Boats are the best custom built boats around.
